Examiner's Statement of Reasons for Allowance

Application/Control Number: 09/772,800 Page 2

Art Unit: 1771

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 1, 2004, has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on November 1, 2004, has been considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffery Bacon on September 15, 2004.

The application has been amended as follows:

**Cancel claims 18, 25, 26, 65-71, and 73-77.

**Amend claim 19 as follows:

Art Unit: 1771

39

Currently Amended) The device according to Claim [[18]] 76, wherein said repellent finish comprises a copolymer of perfluoroalkyl acrylate.

**Add the following new claims:

- 78. (New) The device according to Claim 1, wherein the repellant finish of said coating includes a repellant material selected from the group consisting of : a fluorochemical; a silicon; a resin-based finish; a wax; a wax-metal emulsion; and an organometallic complex.
- (New) The device according to claim 1, wherein said repellant finish includes polymers of dimethylsiloxane.
- (New) The device according to Claim 1, wherein said repellent finish includes polymers of dimethylsiloxane.

**Change the status identifiers of the following claims:

- 4. (Previously [[amended]] <u>presented</u>) The device according to Claim 3, wherein the nitrogen containing material is selected from the group consisting of: primary amine, secondary amine, tertiary amine, and quaternary amine.
- 6. (Previously [[amended]] presented) The device according to Claim 3, wherein the nitrogen containing material comprises a primary amine selected from the group consisting of: polyvinylamine and polyallylamine.
- 8. (Previously [[amended]] <u>presented</u>) The device according to Claim 7, wherein said cationic monomers include material selected from the group consisting of diallyldimethylammonium chloride and methacrylamidopropyltrimethyl ammonium chloride.
- 10. (Previously [[amended]] presented) The device according to Claim 9, wherein said cationic

Art Unit: 1771

monomers include material selected from the group consisting of diallyldimethylammonium chloride and methacrylamidopropyltrimethyl ammonium chloride.

13. (Previously [[amended]] <u>presented</u>) The device according to Claim 2, wherein the cationic material comprises a metal salt material.

(Previously [[amended]] <u>presented</u>) The device according to Claim 18, wherein the metal salt material includes an anion of a weak acid.

24. (Previously [[amended]] <u>presented</u>) The device according to Claim 23, wherein said additional comonomers include esters of acrylic or methacrylic acid containing material selected from the group consisting of: alkyl groups, alkylamide groups, and polyether groups.

2 \27. (Previously [[amended]] <u>presented</u>) The device according to Claim 1, further including an image disposed on the first surface of said textile having the coating thereon.

(Previously [[amended]] <u>presented</u>) The device according to Claim 45, wherein said fluorochemical comprises a fluorocarbon dispersion.

(Previously [[amended]] <u>presented</u>) A device comprising a textile coated with a cationic material and a repellant finish, wherein said repellant finish comprises a repellant selected from the group consisting of: a fluorochemical, a wax, a wax-metal emulsion, and an organometallic complex, wherein said textile further comprises an image, the image having a color intensity of greater than 68.4 for the color black.

**Write out the text of the following withdrawn claims.

65. (Withdrawn) A method comprising the steps of: applying a coating to at least a first side of a textile, said coating having

Art Unit: 1771

cationic and repellant properties; applying an image to the first side of the textile with the coating thereon.

- 66. (Withdrawn) The method according to Claim 65, wherein said step of applying a coating includes applying the coating to the textile in an aqueous form.
- 67. (Withdrawn) The method according to Claim 66, wherein said step of applying the coating further includes dipping the textile into the aqueous form of the coating.
- 68. (Withdrawn) The method according to Claim 66, further including the step of squeezing the textile between rollers after the step of applying the coating and prior to the step of applying the image.
- 69. (Withdrawn) The method according to Claim 66, further including the step of drying the textile after the step of applying the coating and prior to the step of applying the image.
- 70. (Withdrawn) The method according to Claim 65, wherein said step of applying the image includes applying the image with digital printing.
- 71. (Withdrawn) The method according to Claim 65, wherein said step of applying the image includes applying the image with an ink jet printer.
- 73. (Withdrawn) A device comprising a textile with an image thereon, the image having a color intensity of greater than 60.7 for the color red.
- 74. (Withdrawn) A device comprising a textile with an image thereon, the image having a color intensity of greater than 56.7 for the color yellow.
- 75. (Withdrawn) A device comprising a textile with an image thereon, the image having

Art Unit: 1771

a color intensity of greater than 56.3 for the color blue.

76. (Withdrawn) A device comprising a woven textile with an image thereon, the image having an acuity ratio of about 1 in the warp direction of said textile.

77. (Withdrawn) A device comprising a woven textile with an image thereon, the image having an acuity ratio of between about 1 and about 1.3 in the fill direction of said textile.

Reasons for Allowance

- 4. Claims 1-17, 19-24, 27-64, 72, and 78-80 are allowed.
- 5. The following is an examiner's statement of reasons for allowance: all rejections have been overcome by Applicant's Rule 1.132 declaration filed November 13, 2003 and by the filed terminal disclaimers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ula C Ruddock whose telephone number is 571-272-1481. The examiner can normally be reached on Monday-Thursday.

Art Unit: 1771

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H. Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
